Sir:

PRELIMINARY AMENDMENT

Prior to the examination of the above application, please amend this application as follows:

IN THE CLAIMS:

Please cancel claim 1 and add new claims 54-73 as follows.

54. A monitoring system for a pressure relief device, comprising:
 - a release sensor configured to provide an indication when the pressure relief device activates;
 - a first communication device connected to the release sensor and configured to send a wireless transmission having an activation signal when the indication is provided by the release sensor and configured to send a wireless transmission having a status
